

Effective Test Automation

Perfecto's cloud-based CQ Lab and ScriptOnce™ automation tool empower DevTesters to speed up app releases without sacrificing quality. Use our Automation solution to bring your end-users into your test lab where you can inject real user profiles into existing test scenarios and execute them across devices, digital platforms and network conditions.

Cross-platform test automation using Appium on real devices.

BENEFITS AND CAPABILITIES

INTEGRATE WITH EXISTING TOOLS

Use commercial tools, open-source tools like Appium and Selenium, or integrate your own solution independently through our Open APIs. Being open and integrated allows for a variety of tools, skillsets and people.

EXTEND TO USER-DRIVEN TESTING WITH WIND TUNNEL™

Set user profiles within test code to mimic real-world environments including network conditions, locations, screen orientation, incoming alerts, app vitals and timers, and background-running apps.

PERFORM OBJECT VALIDATION

We offer the flexibility to use the object validation approach (image, OCR or native object properties) that works for you.

AUTOMATE ACROSS PLATFORMS

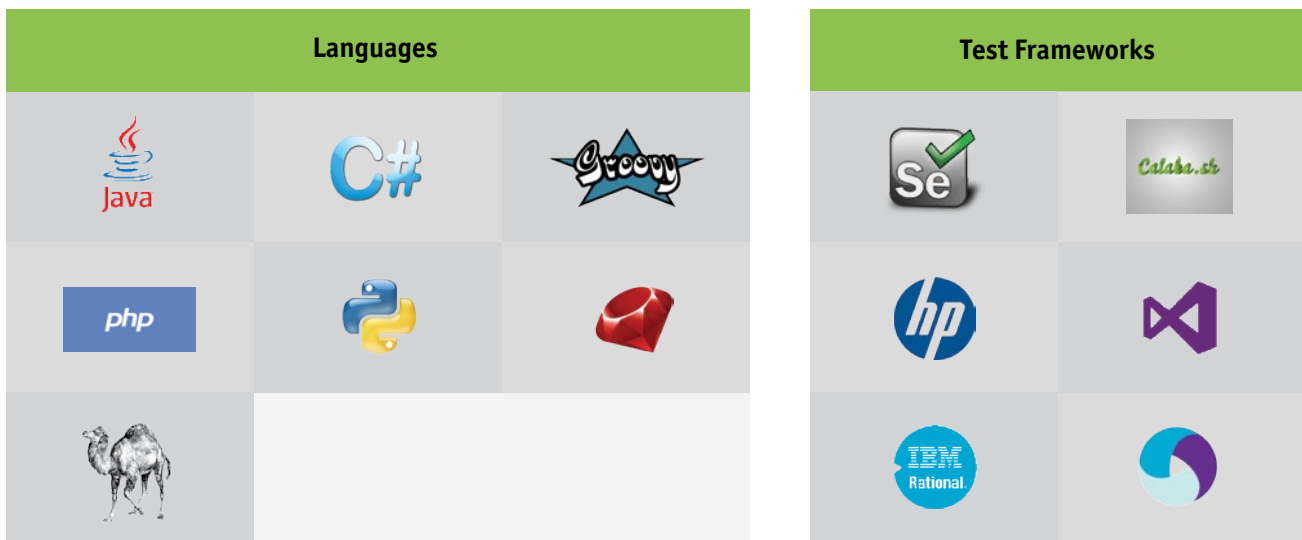

Achieve this by applying cross-platform, parallel test automation with one single script for various mobile platforms such as iOS, Android, BlackBerry and Windows Phone.

SPEED UP FEEDBACK LOOP

Fast feedback to developers helps resolve issues quickly. Use visual reports, logs, and video recording of test runs to create an efficient feedback loop.

ELIMINATE QA BOTTLENECKS

Mobile test automation eliminates costly quality assurance bottlenecks and helps achieve continuous integration and fast release cycles.

Perfecto's Automation solution agnostically supports a variety of languages and test frameworks.

About Perfecto

Perfecto enables exceptional digital experiences. We help you transform your business and strengthen every digital interaction with a quality-first approach to creating web and native apps, through a cloud-based test environment called the [Continuous Quality Lab](#). The CQL is comprised of real devices and real end-user conditions, giving you the truest test environment available.

More than 1,500 customers, including 50% of the Fortune 500 across the banking, insurance, retail, telecommunications and media industries rely on Perfecto Mobile to deliver optimal mobile app functionality and end user experiences, ensuring their brand's reputation, establishing loyal customers, and continually attracting new users. For more information about Perfecto Mobile, visit perfectomobile.com, join our [community](#), or follow us on Twitter at [@PerfectoMobile](#).
